Multi Mission

FIRELINE

Multi Mission

Design with a Purpose

PGI is a high performance PPE manufacturer with a drive and relentless commitment to meticulous design, craftsmanship and service. Using only advanced premium materials and accessories allows us to create technical products that can be trusted to perform in the most extreme conditions. Our philosophy is to design and manufacture products that are as good as they can possibly be, performing over time and beyond expectation. Garments are designed to provide unrivaled performance at the point of extreme need.

TECHNOLOGY

Lightweight, flexible and more responsive, FireLine™ Multi Mission PPE is built for the work you do. Innovative fabrics offer the best combination of flash fire, thermal protection and abrasion resistance in a single-layer garment. Innovative design with articulated elbows and knees, generous gusseting, radial sleeves and anatomical patterning provides unrivaled freedom of movement. High quality construction and more options for truly custom gear mean you have the right gear, to do the right job, day in and day out. FireLine™ Multi Mission garments offer first responders peace-of-mind protection with enhanced comfort, mobility and best-in-class performance.

A LIGHTWEIGHT, BREATHABLE SOLUTION TO TRADITIONAL TURNOUT GEAR

Heat Stress

The number one fatality in line of duty deaths among firefighters and first responders is sudden cardiac arrest, most of which can be attributed to heat stress, overexertion and pre-existing medical conditions. Studies have shown that modified PPE can substantially reduce heat stress and firefighter fatigue. The weight and bulkiness of traditional turnout gear tends to increase body temperature by retaining the heat built up internally while on the job. Elevated body temperatures can increase clotting, which can also contribute to sudden cardiac arrest while performing routine tasks. FireLine™ Multi Mission PPE is lightweight, more flexible and ergonomically designed to offer enhanced evaporative cooling — reducing heat stress and overall firefighter fatigue.

Proven FR Fabrics

Nomex® IIIA — Plain weave with a durable water repellent and stain resistant finish. Fabric is inherently flame resistant and does not melt, drip or burn after exposure to flame or heat. Special P140 fibers give the fabric permanent anti-static properties. Nomex IIIA resists acids, alkalis and industrial lubricants. Easy to wash and dry with extremely low shrinkage. Fabric combines mechanical strength with exceptional abrasion and tear resistance for a long wear life (wear life can exceed FR cotton by 6X). Nomex IIIA is the fabric of choice for the U.S. Forest Service.

Sigma™ 4 Star — Twill weave with durable water repellent finish. Inherently flame resistant and does not melt, drip or burn after exposure to heat or flame. Solution-dyed which maintains colorfastness and appearance better than other fabrics on the market. Sigma is exceptionally comfortable due to soft, supple hand and superb wicking abilities, keeping the wearer cooler and drier. Sigma is worn by over 100,000 U.S. soldiers.

Lightweight, Breathable and More Comfortable

FireLine™ Multi Mission PPE is designed to be a lightweight, flexible and breathable alternative to turnout gear. Traditional gear is heavy, bulky, locks in moisture and air — whereas FireLine™ Multi Mission PPE pulls sweat from the skin by moving it to the surface so it rapidly evaporates, allowing the wearer to remain cooler and drier, reducing the potential for heat stress while improving overall performance of routine tasks. FireLine™ Multi Mission garments are engineered to maximize protection, comfort and mobility at a price that's about one-third the cost of turnout gear.

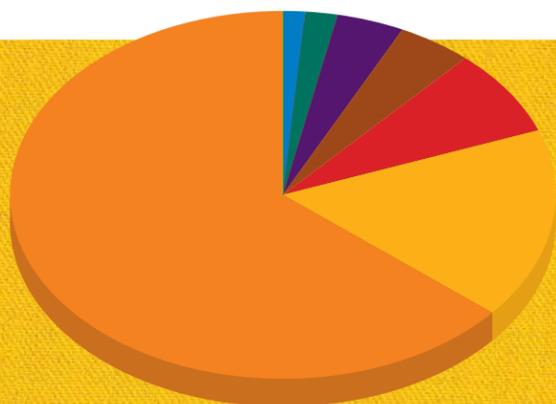

Agility® Tactical

Delivering adaptive protection, Agility® Tactical combines maximum protection and comfort with increased flexibility. This ultra-lightweight

fabric features Enforce™ Technology to ensure a balanced fabric that promises strength and durability throughout the outer shell. Meets or exceeds NFPA 1977 for Wildland Firefighting and NFPA 1951 standards for Technical Rescue.

Pioneer™ Reinforcement Fabric — Twill weave with Enforce™ Technology that transforms high strength Kevlar® fibers into super-strong strands spun into a double-helix formation. A lightweight, flexible fabric, virtually impossible to tear. Pioneer includes a durable water repellent finish with enhanced abrasion resistance. Unmatched performance as a reinforcement in high-wear areas such as knees, elbows and cuffs.

#FL-101	Detachable and Adjustable Radio Pocket (Jacket Only)

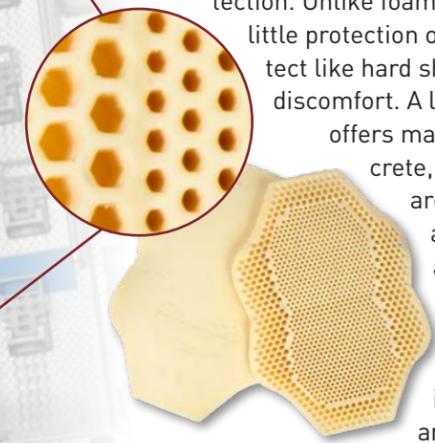

Flame Resistant ID Label

Flame resistant label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.

The Power of the Honeycomb

SQUISH® Pad Technology is designed with an array of honeycomb structure walls and cavities that work together to provide super comfort and improved protection. Unlike foam pad inserts that provide very little protection or support, SQUISH® pads protect like hard shell pads without the weight or discomfort. A lightweight, low-profile design offers maximum defense against concrete, rock and steel. SQUISH® pads are non-porous, resisting water and sweat, so no need to worry about bacteria or microbial growth. Exclusive to FireLine™ Multi Mission garments, these SQUISH® pads are virtually indestructible, will not flatten and will last for the life of the garment. SQUISH® pads are laundry safe and encased within high-strength para-aramid needle punch felt and Nomex® IIIA woven fabric for increased flame, cut and puncture resistance.

Note: SQUISH® pads are not UL Certified.

SQUISH® Honeycomb Silicone Elbow Pads

Part Number	Description
#FL-95	SQUISH® Elbow Pad

NFPA 1951 + NFPA 1977

- Elasticized waist band with take-up straps.
- Seven 2" wide belt loops and snap at waist.
- Super-strong, self-locking FR Zytel® zipper fly.
- Six pockets including expandable 3-D cargo pockets, all with hook and loop flap closures.
- Water bottle holder inside right cargo pocket.
- Articulated knee and contoured leg panels.
- Knee high FR Zytel® leg zippers allows donning and doffing with boots on.
- Elasticized cuffs with expansion gussets and adjustable tab closures interface perfectly with boots.
- Rugged, tear resistant, Pioneer™ reinforced knees and cuffs.
- FR Zytel® side access zipper openings.
- High visibility triple-trim with color options.
- Optional suspender loops designed for four-point suspension system.
- Optional SQUISH® knee pads for cut and puncture resistance (details on page 7).

FIELD PANTS

FireLine™ Multi Mission pants offer an ergonomic sculptured design, articulated knees and our signature relaxed fit for unmatched freedom of movement, comfort and protection. Six pockets including expandable 3-D cargo pockets allow generous storage capacity. Elastic back waistband with adjustable side take-up straps for a custom fit. Seven belt loops accommodate a two inch wide belt. Super tough Zytel® nylon zippers used throughout. Fully adjustable elasticized cuffs can be worn open for venting or secured for protection from flame, heat, and soot.

Smokechaser Field™ (Deluxe) Coat Features and Benefits

- Four inch high Alpine style collar can be worn folded down to allow venting or zipped up to completely cover neck providing additional protection from heat and flame. Unlike conventional Wildland coats no bulky throat strap and closure system required. Hanger loop at neck.
- Flame resistant Label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.
- Seamless shoulders eliminate bulky seams and allow maximum mobility while reducing wear and seam pressure under weight of a pack harness.
- Double pull Zytel FR50 Delrin zipper with Nomex tape is covered by storm-flap with intermittent hook/loop closures.
- Radio pocket with hook/loop flap closure and microphone holder loop is set above the pocket flap.
- Cell phone pocket with hook and loop flap closure on right chest and D-ring at bottom for hanging gloves or gear.
- Radial sleeve design allows full arm movement and assures “no hike” fit when arms are raised over shoulders.
- Articulated elbows promote freedom of movement as well as a more contoured fit.
- Adjustable cuffs incorporate hook/loop tab closure for easy adjustment even when wearing gloves. Partially elasticized wrist allows cuff to be tightly secured without impeding circulation or movement.
- Gusset at cuff has secondary hook/loop strip allowing cuff to be opened to its fullest extent for maximum ventilation or to allow glove cuff to be tucked inside.
- Large cargo hip pockets with hook/loop flap closures expand for extra storage capacity and have built-in hand warmer compartments. Right cargo pocket has ¾” wide nickel-plated swivel snap hook attached to 6” self-fabric strap. Snap hook sewn to inside of pocket. Strap allows it to be pulled out for easy accessibility. Perfect for securing key rings or other valuables.
- 3M™ Scotchlite™ Flame Resistant Retro Reflective Lime/Yellow two inch wide Triple Trim sewn around arms, bottom and across shoulders in back
- U.L. Classified to meet or exceed NFPA 1977 standard on Protective Clothing and Equipment for Wildland Fire Fighting (Current Edition). Requirements for Cal-OSHA Title 8 GISO Sections 3406 (c)(1) and/or 3410(d)(1).

Smokechaser Field™ (Deluxe) Pant Features and Benefits

- Self material waistband with elasticized back has seven belt loops wide enough to accommodate a two inch wide belt.
- Flame resistant Label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.
- Corrosion-resistant carbon steel ladder buckle at waist with self fabric take-up straps allow a generous four-inch waist adjustment.
- Corrosion-resistant brass snap at waist is fabric backed so no metal touches skin.
- Zytel FR50 Delrin zipper with Nomex tape front fly closure is double-needle lockstitch set for extra strength and durability.
- Welt-style rear pockets have spade-style flaps with color coordinated hook and loop closures.
- Front slash-style pockets have extra deep contoured pocket bags and spade-style flaps with color-coordinated hook and loop closures to keep contents from falling out.
- Zytel FR50 Delrin zippers with Nomex tape at side access is lockstitch set allowing easy access to undergarments.
- Over-sized mid-thigh cargo pockets have hook and loop flap closures and are expandable for extra storage capacity.
- Leg outseams and seat seams are sewn with five-thread safety stitch . . . then top stitched with a double-needle lockstitch to absolutely eliminate seam failure.
- Articulated knees promote freedom of movement as well as a more contoured fit.
- Gusseted leg has multiple cuff closure system comprised of 14" Zytel FR50 Delrin zippers with Nomex tape, elastic and hook/loop tab closure to adjust the take-up. Partially elasticized cuffs allow cuffs to be tightly secured without impeding circulation or movement.
- 3M™ Scotchlite™ Flame Resistant Retro Reflective Lime/Yellow two inch wide Triple Trim sewn around legs between knees and cuffs.

The Smokechaser (DELUXE™) Jumpsuit has the best features of our Smokechaser (DELUXE) Coat and Pant combined into one. Meticulously engineered to provide unrestricted freedom of movement and unsurpassed comfort and protection. Complete protection in a convenient one-piece jumpsuit.

- Generous cut for comfort, ease of movement and layering.
- Ergonomic sculptured design for a more contoured fit.
- Articulated elbows and knees promote freedom of movement.
- Radial sleeve design – full–reach gusseted underarm panels for mobility.
- Seamless shoulders eliminates seam pressure points when wearing back pack.
- Full length two-way self-locking zipper front closure extends to the top of the collar and is covered by a self-fabric storm flap which secures shut with five intermittent spaced hook and loop closure system.
- Alpine collar can be worn open to allow venting or zipped up to completely cover neck for additional protection from flame and heat.
- Elasticized waistband with adjustable side take-up straps allow 4” waist adjustments.
- Radio pocket on left chest with hook and loop flap closure and mic holder loop set above flap.
- Cell phone/pager pocket on right breast with hook and loop flap closure and D-Ring loop at pocket bottom for hanging gear or gloves.
- Extra deep front slash pockets with hook and loop flap closures to keep contents secure.
- Zippered side seam pass-through trouser access openings. Two oversized bellowed cargo pockets on thighs expand to give you plenty of storage capacity and secure close with hook and loop flap closures. Right pocket has strap with swivel snap hook attached – perfect for securing key rings or other valuables
- Two large rear pockets with hook and loop flap closures.
- Gusseted sleeve cuffs are elasticized and have adjustable hook and loop closures allowing ventilation when open or can be tightly secured without impeding circulation or movement.
- Gusseted leg cuffs are elasticized and have adjustable hook and loop closures allowing ventilation when open or can be tightly secured without impeding circulation or movement.
- Extra-long leg zippers allow easy donning and doffing with boots on.
- All zippers super tough, flame resistant Zytel® Nylon which is stronger and lighter than metal and self-lubricating to avoid sticking and crimping.
- 2” wide Flame Resistant Retro Reflective Lime/Yellow with Silver Stripe (triple trim) is sewn around mid-biceps, across shoulders in back, and around legs at mid-calf.
- Hanger loop at inside neck.
- Flame resistant Label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.
- All points of stress bartacked.
- Sewing throughout done with heavy-weight 100% Nomex thread.
- Meets or exceeds NFPA 1977 Standard on Protective Clothing and Equipment for Wildland Fire Fighting (Current Edition).
- Compliant with NFPA 70E (Current Edition) – Meeting the performance specifications of ASTM – F-1506 for wearing apparel used by electrical workers exposed to arc and related thermal exposures.
- Meets CAL-OSHA Requirements – Passes Fed. Test 191, Method 5903.2; CAL-OSHA Sections 3406(d).
- Complies with OSHA Rule 29 CFR Part 1910, 269.

We continually strive to improve our products therefore may make minor adjustments to features or components. This would be subject to change without prior notice. Contact PGI, Inc. at 1-800-558-8290 to ensure you have the latest design information.

CLASSIC FIRELINE™ SHIRT/JACKET

Designed in accordance to the U.S. Forest Service Specifications. Generously patterned to allow unrestricted range of motion and comfort. Can be worn by itself as a shirt or layered over your favorite tee as a lightweight jacket.

CLASSIC FIRELINE™ SHIRT/JACKET Features

- Available in Yellow - 6 oz. Nomex IIIA, Yellow 7 oz. Ultra Soft or 7 oz. Tecasafe Plus.
- Generous cut to allow unrestricted range of motion, comfort and the ability to layer underneath.
- Flame resistant label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.
- Large breast pockets with hook and loop flap closures.
- Adjustable hook and loop cuff closures which can be worn open for ventilation or secured tightly over gloves when battling a blaze.
- Yellow heavy duty flame resistant melamine button front closures.
- Extra-long square cut tails allow shirt/jacket to be worn either tucked in like a shirt or out like a lightweight jacket.
- Lined collar for better appearance and protection.
- All points of stress are bartacked.
- Heavy weight Nomex thread used throughout.
- Meets or exceeds NFPA 1977 Standard on Protective Clothing and Equipment for Wildland Fire Fighting (Current Edition).
- Compliant with NFPA 70E (Current Edition) – Meeting the performance specifications of ASTM – F-1506 for wearing apparel used by electrical workers exposed to arc and related thermal exposures.
- Meets CAL-OSHA Requirements – Passes Fed. Test 191, Method 5903.2; CAL-OSHA Sections 3406(d).

- Complies with OSHA Rule 29 CFR Part 1910, 269.

DOUBLE DUTY BDU STYLE PANT - Dual Classified

**NFPA 1975: STANDARD ON STATION/WORK UNIFORMS FOR EMERGENCY SERVICES,
CURRENT EDITION**

**NFPA 1977: STANDARD ON PROTECTIVE CLOTHING AND EQUIPMENT FOR WILDLAND FIRE
FIGHTING, CURRENT EDITION**

- Self-material waistband with elastic back has seven belt loops wide enough to accommodate a two inch wide belt and allows for freedom of movement and optimum comfort.
- ZYTEL FR50 Delrin zipper with Nomex tape front fly closure is lockstitch set for extra strength and durability.
- Corrosion-resistant brass snap at waist is fabric backed so no metal touches skin.
- Front slash pockets.
- Two rear patch style pockets with hook and loop flap closure.
- Self fabric reinforced crotch panel is double-needle set for durability.
- Two large pleated cargo pockets are located at the mid-thigh with hook and loop flap closure.
- Leg outseams are sewn with five-thread safety stitch- then top stitched with a double-needle lockstitch to eliminate seam failure.
- Cuff closure system comprised of hook and loop tab through metal box ring to adjust take up.
- All sewing done with Nomex Thread. Stitches average 9-10 stitches per inch. Assembly seams are overedged plus chain stitched. Single and Double-needle operations are lock-stitched.
- Flame resistant label sewn down on four sides facilitates tracking and identification through barcoding, sequential numbering and personalization.
