3M and Scotchlite are trademarks of 3M

Veridian makes no compromises in constructing comfortable, performance-based fire protective apparel. Clever design elements with superior materials and workmanship are standard with every set of gear that we build. All Veridian gear is custom-made to each firefighter's measurements to ensure the best possible comfort and fit. Established in 1992, Veridian products have earned the respect and acceptance of customers around the world.

Veridian is a proud USA manufacturer, producing all of our gear in our ISO 9001 certified facilities in Spencer, IA & Quitman, AR.

Manufacturer of Quality Protective Gear

VELOCITY

Designed for Rapid Response.

Velocity's ergonomic design is engineered to provide fire-fighters with an unrestricted full range of motion. Ultra FlexKnee triple pleated trousers provide unsurpassed comfort. Velocity's Ultra FlexWing Expanded Back coat delivers a bind free reach. The FlexElbow adds outer shell pleats combined with liner darts to provide a natural contour at the elbow while complementing the integrated seamless underarm bellows. Engineered with minimal seams for maximum durability.

Also available for Proximity Aircraft Rescue Fire Fighting. Ask for the Vector Max series.

Escape/Ladder Belt

See Page 15 · Integrated Belt also available

VELOCITY SERIES: UL certified to meet or exceed current edition of NFPA 1971 Standard.

NEW! Fold-over Soft Turn-down Collar

Full coverage protection that easily folds over when not in use for maximum everyday comfort. Now including a standard inspection port.

Your Choice Coats

Available in lengths from 29 to 45 inches.

Your Choice Trousers Back

Choose waist high with a 35" coat, semi-high with a 32" coat or high back with a 29" coat.

Nomex® Bartack Reinforcements

Coat & Trousers
Double row bartacks provide superior strength at the garment stress points

28" inseam standard, customized in 1" increments

Garments are pictured with popular options.

Generous Seat Design

For added garment strength and comfort

Ultra FlexWing Expanded Back

Outer Shell and Inner Liner
Enhances range of motion

FlexElbow

Ergonomics in all three layers

3M Scotchlite™
Reflective Material

Escape/Ladder Belt

Optional · For superior comfort; makes suspenders optional. Belt is protected from excessive wear by an outer shell material channel.

Fly Closure

Hook & Loop with Compression Snap Outer, Zipper Inner when integrated belt is chosen. Many other closures available without belt option.

FITTING AND MEASUREMENT GUIDE

IMPORTANT:

Your Veridian coat and/or trouser sizing will be more accurate if you take extra care with measurements. The following list of measurements are necessary for both men's and women's garments.

Coats:

- 1. Chest size:** Measure loosely over clothing around the fullest part of the chest with the arms at rest. For individuals with broad shoulders, muscular arms and/or back, an additional over the arm-chest measure is extremely helpful. Again, measure loosely over fullest part of chest with arms at rest. Round up both measurements to nearest even size.
- 2. Sleeve length:** You should expect that Veridian's standard sleeve length per size would fit a vast majority of fire fighters. Otherwise, with arms straight down to side, measure from the base of the back of the neck, over the shoulder and down the arm to the base of the thumb.

Trousers:

- 3. Waist:** Measure around waist, over any clothing that would be worn under trousers. Typical men's measurement will be taken just above pant waist, or belt.
- 3a. Stomach:** Please include measurement around stomach for high back trousers.
- 4. Inseam:** Standard inseam lengths are available in one inch increments. Inseam length should be shorter than regular trouser inseam to prevent damage to cuffs. Measure from the crotch down the inside of the leg to the bottom of the ankle bone.
- 5. (Female) Hip:** Measure around the fullest part of the hip area.
